DETAILED ACTION

Response to Amendment

1. Responsive to amendment received on September 13, 2004, claim 1-21 are canceled and amended claim 22, 23 and 25-27 are entered as requested.

Allowable Subject Matter

2. Claim 22-27 allowed.
3. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a method for checking radio link protocol data frames to avoid unnecessary resetting and resynchronization.

The closest prior art Rezaiifar et al. (US Patent 6,408,003) shows a similar method of checking RLP data for frames received out of sequence. Rezaiifar teaches the steps of checking for missing/bad frames according to the expected frame sequence number and asking for retransmission of those frames. Rezaiifar, however, fails to teach the data frame sequence parameter as a function of the number of channels that the RLP data frames can be transmitted across. These features are claimed in independent claims 22 and 23 and render them allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should

preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
